

SSMB-01 Stainless Steel Mine Box

SPECIFICATIONS

- Environmental Camera Housing constructed from heavy duty, high impact stainless steel.
- Housing is specifically designed and manufactured for harsh environments where the camera is likely to come in contact with large amounts of dirt and dust which would impede a drivers vision.
- The Housing allows the camera screen to be kept clean of dirt, dust & grime by way of a washer/ wiper system. The washer/ wiper is activated by the driver within a vehicles cabin when required.
- Housing prolongs the life of a camera in extreme environments.
- Window made from toughened glass, 20 times stronger than laminated windscreen glass.
- 24v Marine wiper motor, located inside housing.
- 20L Water tank standard with System. Larger sizes can be manufactured on request.
- Housing is completely waterproof, dustproof, shockproof and fire resistant.

DIMENSIONS

Water tank: 150mm d x 340mm w (not including attachment bracket plate on each side @ 50mm ea) x 340mm h (this includes the cap which is 70mm h)

Camera Housing: 190mm w, 220mm d (including plug at back & wiper arm at front) x 190mm h. Once shroud is in place on front of box overall depth increases to 230mm

Shroud on front of box: 290mm w x 210mm h (the shroud sits over glass front of box & protects wiper arm & acts as sun visor)
